Description of Resource

This resource provides an opportunity to view a range of video clips relating to environment and pollution of a river as it journeys from source to sea. By selecting the video title on the lower panel, one can view the relevant video clip in the Story of a River interface. Next to the video, a brief description of the theme will be displayed. High level of student interface functionality allows students to jump with ease to desired clips at any time. With some adaptation (help from Web Application Developer) this tool can be re-purposed by removing the existing videos and adding new ones with their relevant thematic descriptions.

Learning Strategy

This tool turns an in-class experiment into an online experience that can be used by on and off campus students alike. It is used by the lecturers as an example of what teachers/educators can do to enhance in-class activities. Story of a River tells the story of what enters a river's water as it travels from source to sea. It uses graphic video and soundtrack, images and text to show examples of enters the water on its journey. From a clear stream to a dirty river, the Story of a River creates a great opportunity for class discussion.

Learning Outcomes/Objectives

To understand the current issues relating to environment and river pollution.
